

RAJKUMAR RAVICHANDRAN

Frontend Engineer | React.js · TypeScript · Next.js · Frontend Architecture

Coimbatore, Tamil Nadu, India | Open to Bengaluru · Chennai · Hyderabad · Pune · Remote · Relocation
8667415469 | kraj11752@gmail.com | linkedin.com/in/rajkumarravichandran-90301a145

PROFESSIONAL SUMMARY

- Frontend Engineer with 3+ years of hands-on software engineering experience building production SaaS and enterprise applications using React.js, TypeScript, JavaScript and Next.js.
- Experienced in frontend architecture, reusable component design, responsive UI development, REST and GraphQL API integration, state and server-state management, authentication workflows and performance optimization.
- Strong hands-on experience with TanStack Query, Redux, Material UI and Tailwind CSS, with additional experience in React Native and Expo. Experienced across both web and mobile product development, including payment integrations and production release management.
- Hands-on experience with AWS-hosted application delivery and CI/CD workflows, including S3, CloudFront, ECR, EC2, ECS, CodePipeline, Docker and GitHub Actions. Comfortable understanding the complete delivery path from source-code commit through frontend build and cloud hosting to containerized backend deployment.
- Experienced in adopting AI-assisted development workflows for code exploration, implementation, refactoring, debugging, documentation and testing, with human review and engineering standards applied to assisted output. Quick to adopt new technologies, development workflows and project methodologies.

TECHNICAL SKILLS

Frontend:	React.js · TypeScript · JavaScript (ES6+) · Next.js · HTML5 · CSS3 · JSX
Architecture & UI:	Frontend Architecture · UI Architecture · Reusable Components · Component Libraries · Design Systems · Responsive Design · Accessibility · Cross-browser Compatibility · Material UI · Tailwind CSS · Bootstrap
State & Data:	TanStack Query · Redux · Redux Toolkit · REST APIs · GraphQL · Axios · Server State · Client State · API Integration · Caching
Performance:	Code Splitting · Lazy Loading · Memoization · Render Optimization · Core Web Vitals · SSR · SSG
Cloud & DevOps:	AWS S3 · Amazon CloudFront · Amazon EC2 · Amazon ECS · Amazon ECR · AWS CodePipeline · GitHub Actions · Docker · CI/CD · Linux · Vite · Maven
AI-Assisted Dev:	Code Generation · Refactoring · Debugging · Documentation · AI-assisted Code Exploration · Test Assistance · Developer Productivity
Mobile & Engineering:	React Native · Expo · Expo Router · Authentication · Role-based Workflows · API Layer Design · Error Handling · Production Debugging · Git · Vercel · Sentry · Unit Testing · Agile Development
Payments:	Stripe · Razorpay · PayHere

PROFESSIONAL EXPERIENCE

STAIRS7 SOLUTIONS PRIVATE LIMITED

Aug 2024 – Present | India

Frontend Engineer | Legal Designation: Director

- Lead frontend engineering while remaining hands-on with React.js, TypeScript, Next.js and modern frontend development.
- Design reusable component structures and frontend patterns that improve consistency, maintainability and scalability across applications.
- Translate business requirements into practical frontend solutions in collaboration with clients, product stakeholders and development teams.
- Contribute to technical planning, implementation decisions, code reviews and frontend engineering standards.
- Build responsive, data-driven interfaces using React.js, TypeScript, Material UI, Tailwind CSS and reusable component patterns.

- Integrate REST and GraphQL services using Axios and structured API-layer patterns; use TanStack Query and Redux for data fetching, caching, server-state and application-state management.
- Use AI-assisted development workflows for code exploration, implementation acceleration, refactoring, debugging, documentation and test assistance, with human review and validation of assisted output.
- Investigate production issues involving authentication, APIs, application state, performance, native dependencies and release configuration.
- Work across both web and mobile application development, including React Native, Expo and Expo Router.

STAIRS7 — PRE-INCORPORATION PROJECT EXPERIENCE

Jan 2023 – Aug 2024

Frontend Engineer / Software Developer

- Developed production frontend applications using React.js, TypeScript and JavaScript during the pre-incorporation project phase.
- Built reusable UI components, responsive interfaces and API-driven application workflows.
- Worked on SaaS and enterprise-oriented projects involving business workflows, dynamic interfaces and data-driven user experiences.
- Contributed to frontend architecture, API integration, debugging, performance optimization and feature delivery, progressively taking ownership of technical implementation.

AMAZON

Sep 2022 – Dec 2022

Virtual Customer Associate

- Handled customer support operations in a remote virtual associate role, resolving customer issues through virtual support channels and maintaining service and communication standards.

SUGUNA PIPS

May 2021 – Aug 2022

Admission Counselor

- Guided prospective students and parents through admission processes, provided program information, handled enquiries and supported applicants through the enrollment journey.

PROJECT EXPERIENCE

Aptster - Multi-Role SaaS & Community Platform

React.js · TypeScript · Next.js · React Native · Expo · AWS · CI/CD · Payments

- Built and maintained both the web application and companion mobile application for a multi-role SaaS and community platform using React.js, TypeScript and React Native/Expo.
- Architected frontend workflows spanning authentication, community, marketplace, announcements, maintenance and payment-related functionality.
- Developed reusable UI components and modular frontend patterns for scalable feature development.
- Integrated multiple backend services through structured API layers using Axios, REST APIs and GraphQL-based workflows.
- Implemented server-state management, caching and asynchronous data workflows using TanStack Query.
- Developed mobile functionality with React Native, Expo and Expo Router, including authenticated API communication, secure token handling and centralized error handling.
- Integrated and worked with payment flows involving Stripe, Razorpay and PayHere across product payment workflows.
- Used AI-assisted development practices to accelerate code exploration, implementation, refactoring, debugging and documentation while reviewing assisted output for correctness, security and maintainability.
- Worked across Android development and release workflows including Gradle builds, environment configuration, native module integration and production APK generation.
- Diagnosed frontend, authentication, API, native-module and release-build issues across development and production environments.

AWS / CI/CD & Infrastructure Exposure - Aptster

- Worked with the frontend deployment pipeline where GitHub Actions builds the Vite-based web application and publishes the generated static assets to Amazon S3, served via Amazon CloudFront.
- Developed practical understanding of the complete frontend delivery flow from GitHub commit to Vite build to S3 deployment to CloudFront distribution to application domain.

- Worked with backend CI/CD workflows involving GitHub Actions, Maven, Docker and Amazon ECR (Maven packaging JARs, creating Docker images, pushing to ECR).
- Worked with AWS CodePipeline deployment workflows tracking application/image revisions and propagating updated service versions through deployment.
- Worked with EC2/ECS-based containerized backend environments, configuration files, and Linux-based operational procedures used to refresh updated backend containers.
- Comfortable troubleshooting the relationship between frontend releases, backend services, cloud infrastructure, environment configuration and production application behavior.

Stairs7 Enterprise SaaS Platform

React.js · TypeScript · Material UI · Tailwind CSS · REST APIs

- Designed modular frontend workflows, reusable UI components, responsive interfaces and integrated REST APIs for data-driven enterprise.

Sri Balaji Self Drive - Mobility Platform

React.js · Next.js · TypeScript · REST APIs

- Developed responsive vehicle booking and fleet-management workflows with API-driven routing, dynamic application flows and transaction.

Meal Engine - SaaS Discovery Platform

React.js · TypeScript · REST APIs

- Developed dynamic filtering and discovery workflows and applied lazy loading, code splitting and render optimization techniques to improve frontend.

EDUCATION

B.E. - Computer Science & Engineering · Sri Krishna College of Engineering and Technology

Diploma - Computer Engineering · PSG College of Technology
